(54) Title: METHOD AND SYSTEM FOR IDENTIFYING A JURIDICAL PERSON

(57) Abstract: The invention relates to a method and a system for identifying a juridical person (80) in order to provide the juridical person (80) access to a provided service. It comprises the retrieval of the CLI-number provided to a telephone device allocated to the juridical person. The CLI-number being part of the phone communication protocol and being retrieved at a service unit telephone device (82) or a clearing unit telephone device (88), respectively, during a phone call connection trial without establishing the communication. This is accomplished through recognition of the CLI-number, whereby the call is inhibited from being announced at the service unit (82) or the clearing unit (88). The service unit (82) communicates the call to a clearing unit (88), which always decides if the received CLI-number has access to the service provided. Hence, making it possible to provide the service if access is established. The method and the system of the invention are used to provide payment transactions, inlet access transactions for facilities etc.
